collaborate and
manage security
with **users** and
roles in snowflake

hierarchy of **securable objects**

hierarchy of **securable objects**

access control in snowflake

DAC - Discretionary
access control

each object
has an owner

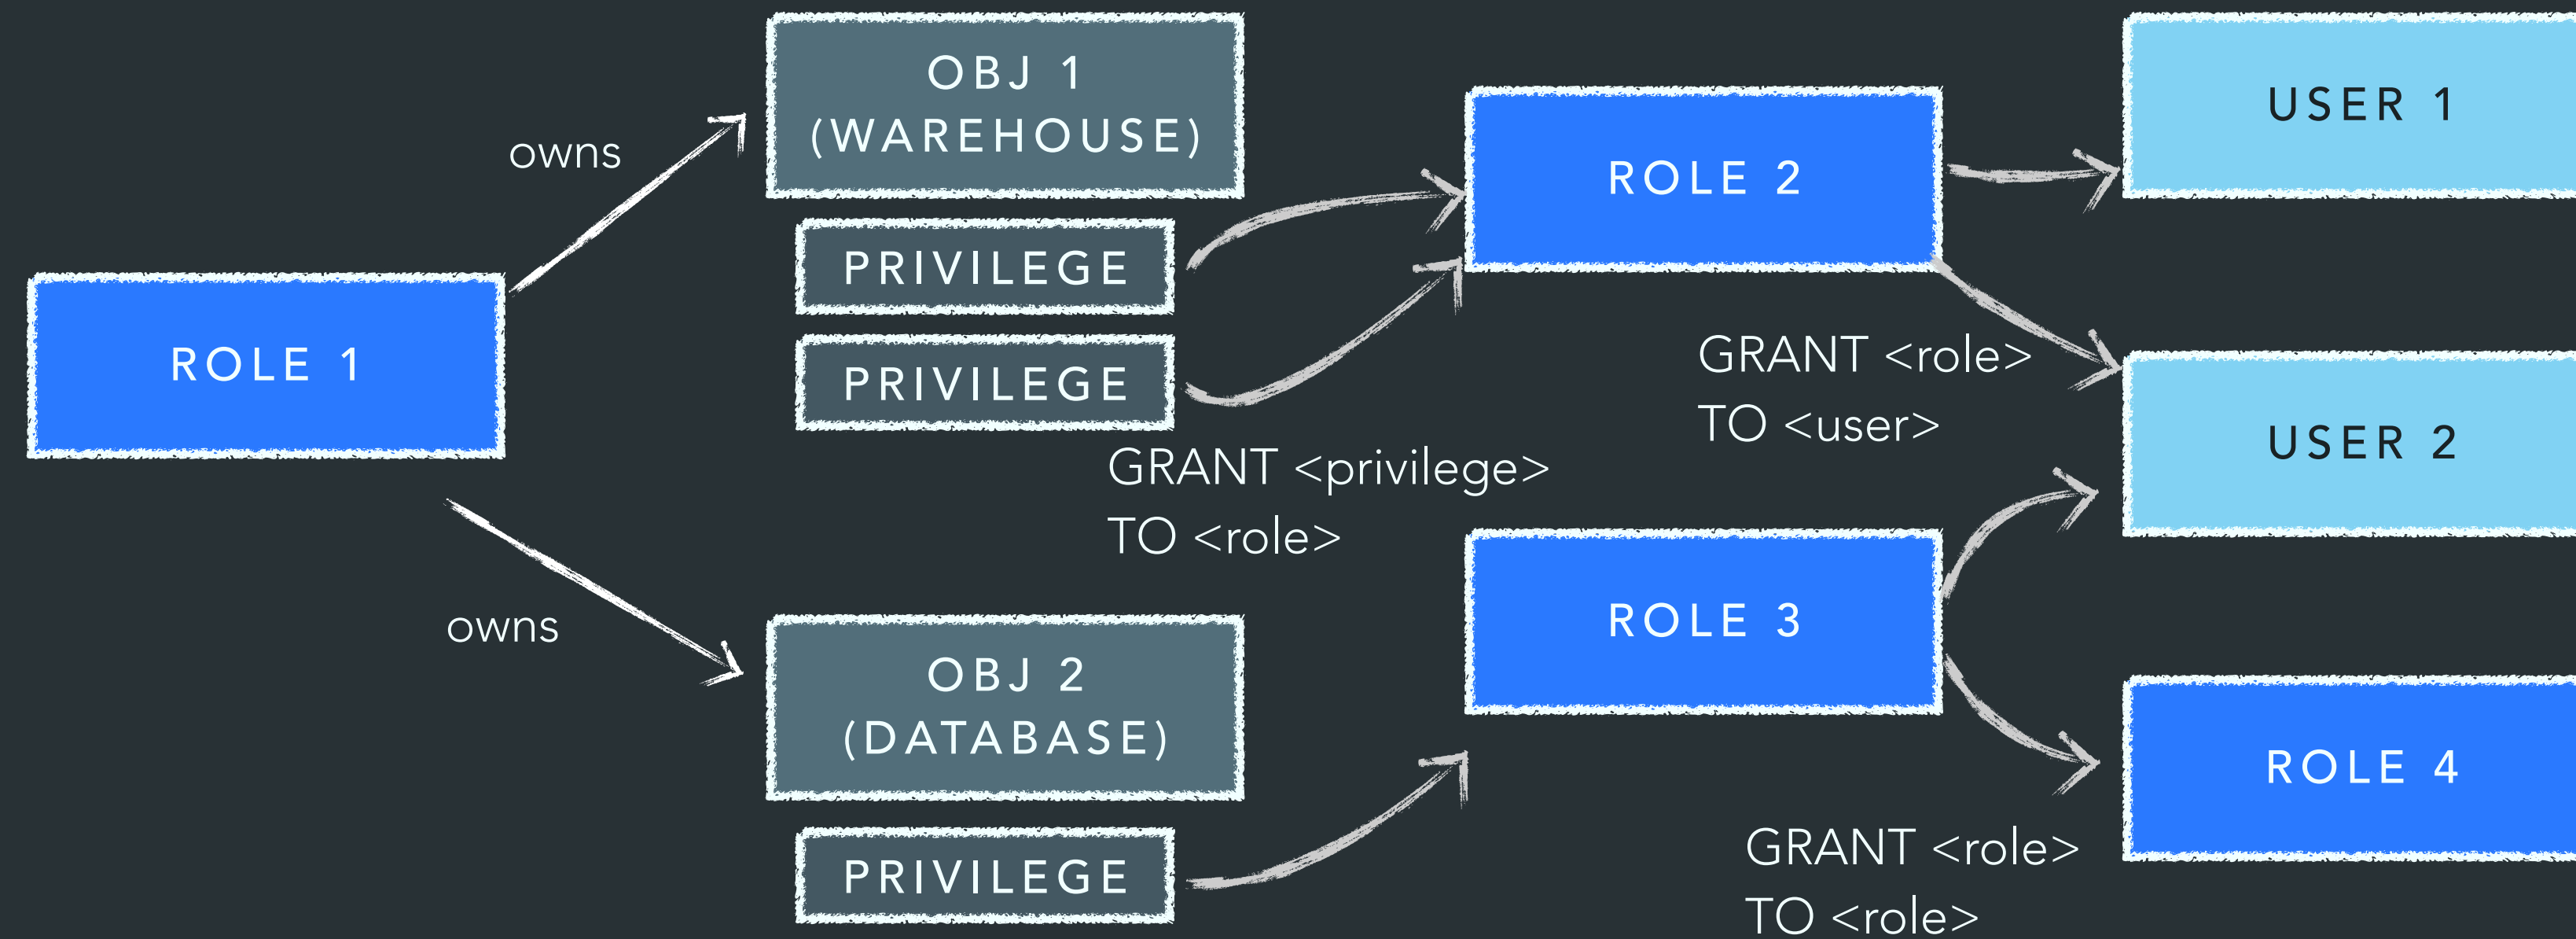

an owner can grant
privilege to access
the object

RBAC - Role-based
access control

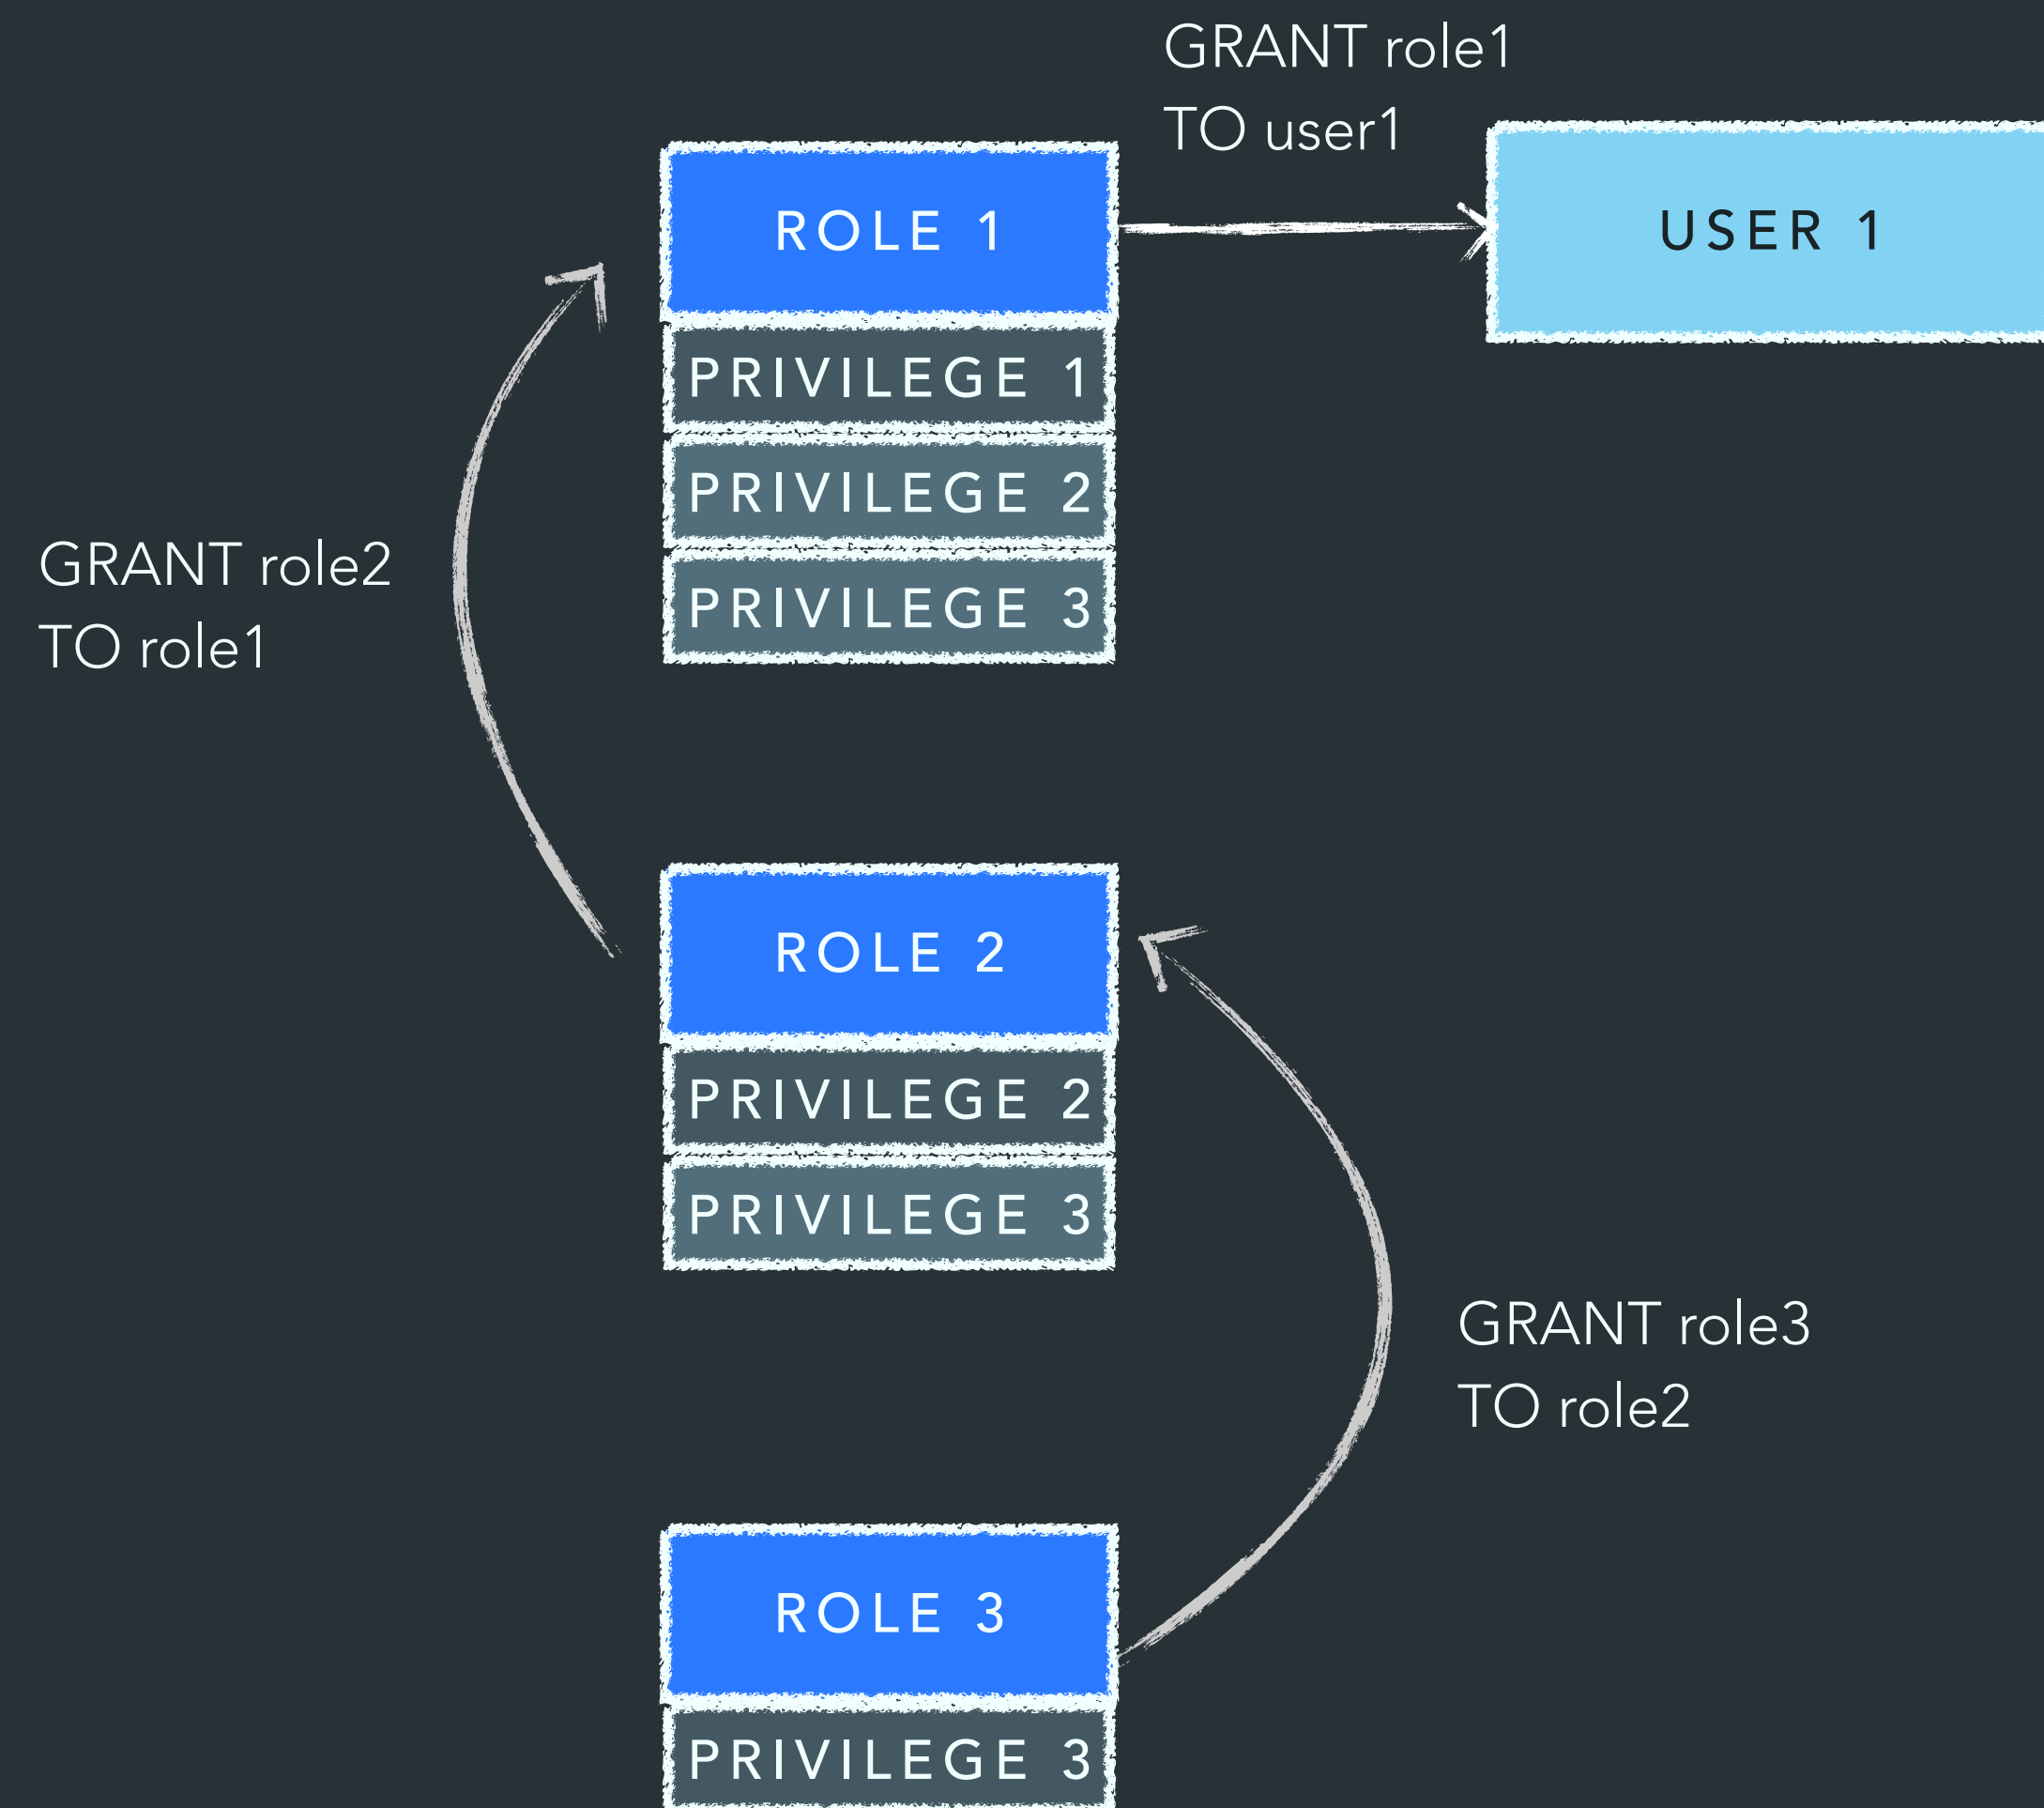

access privileges
assigned to roles

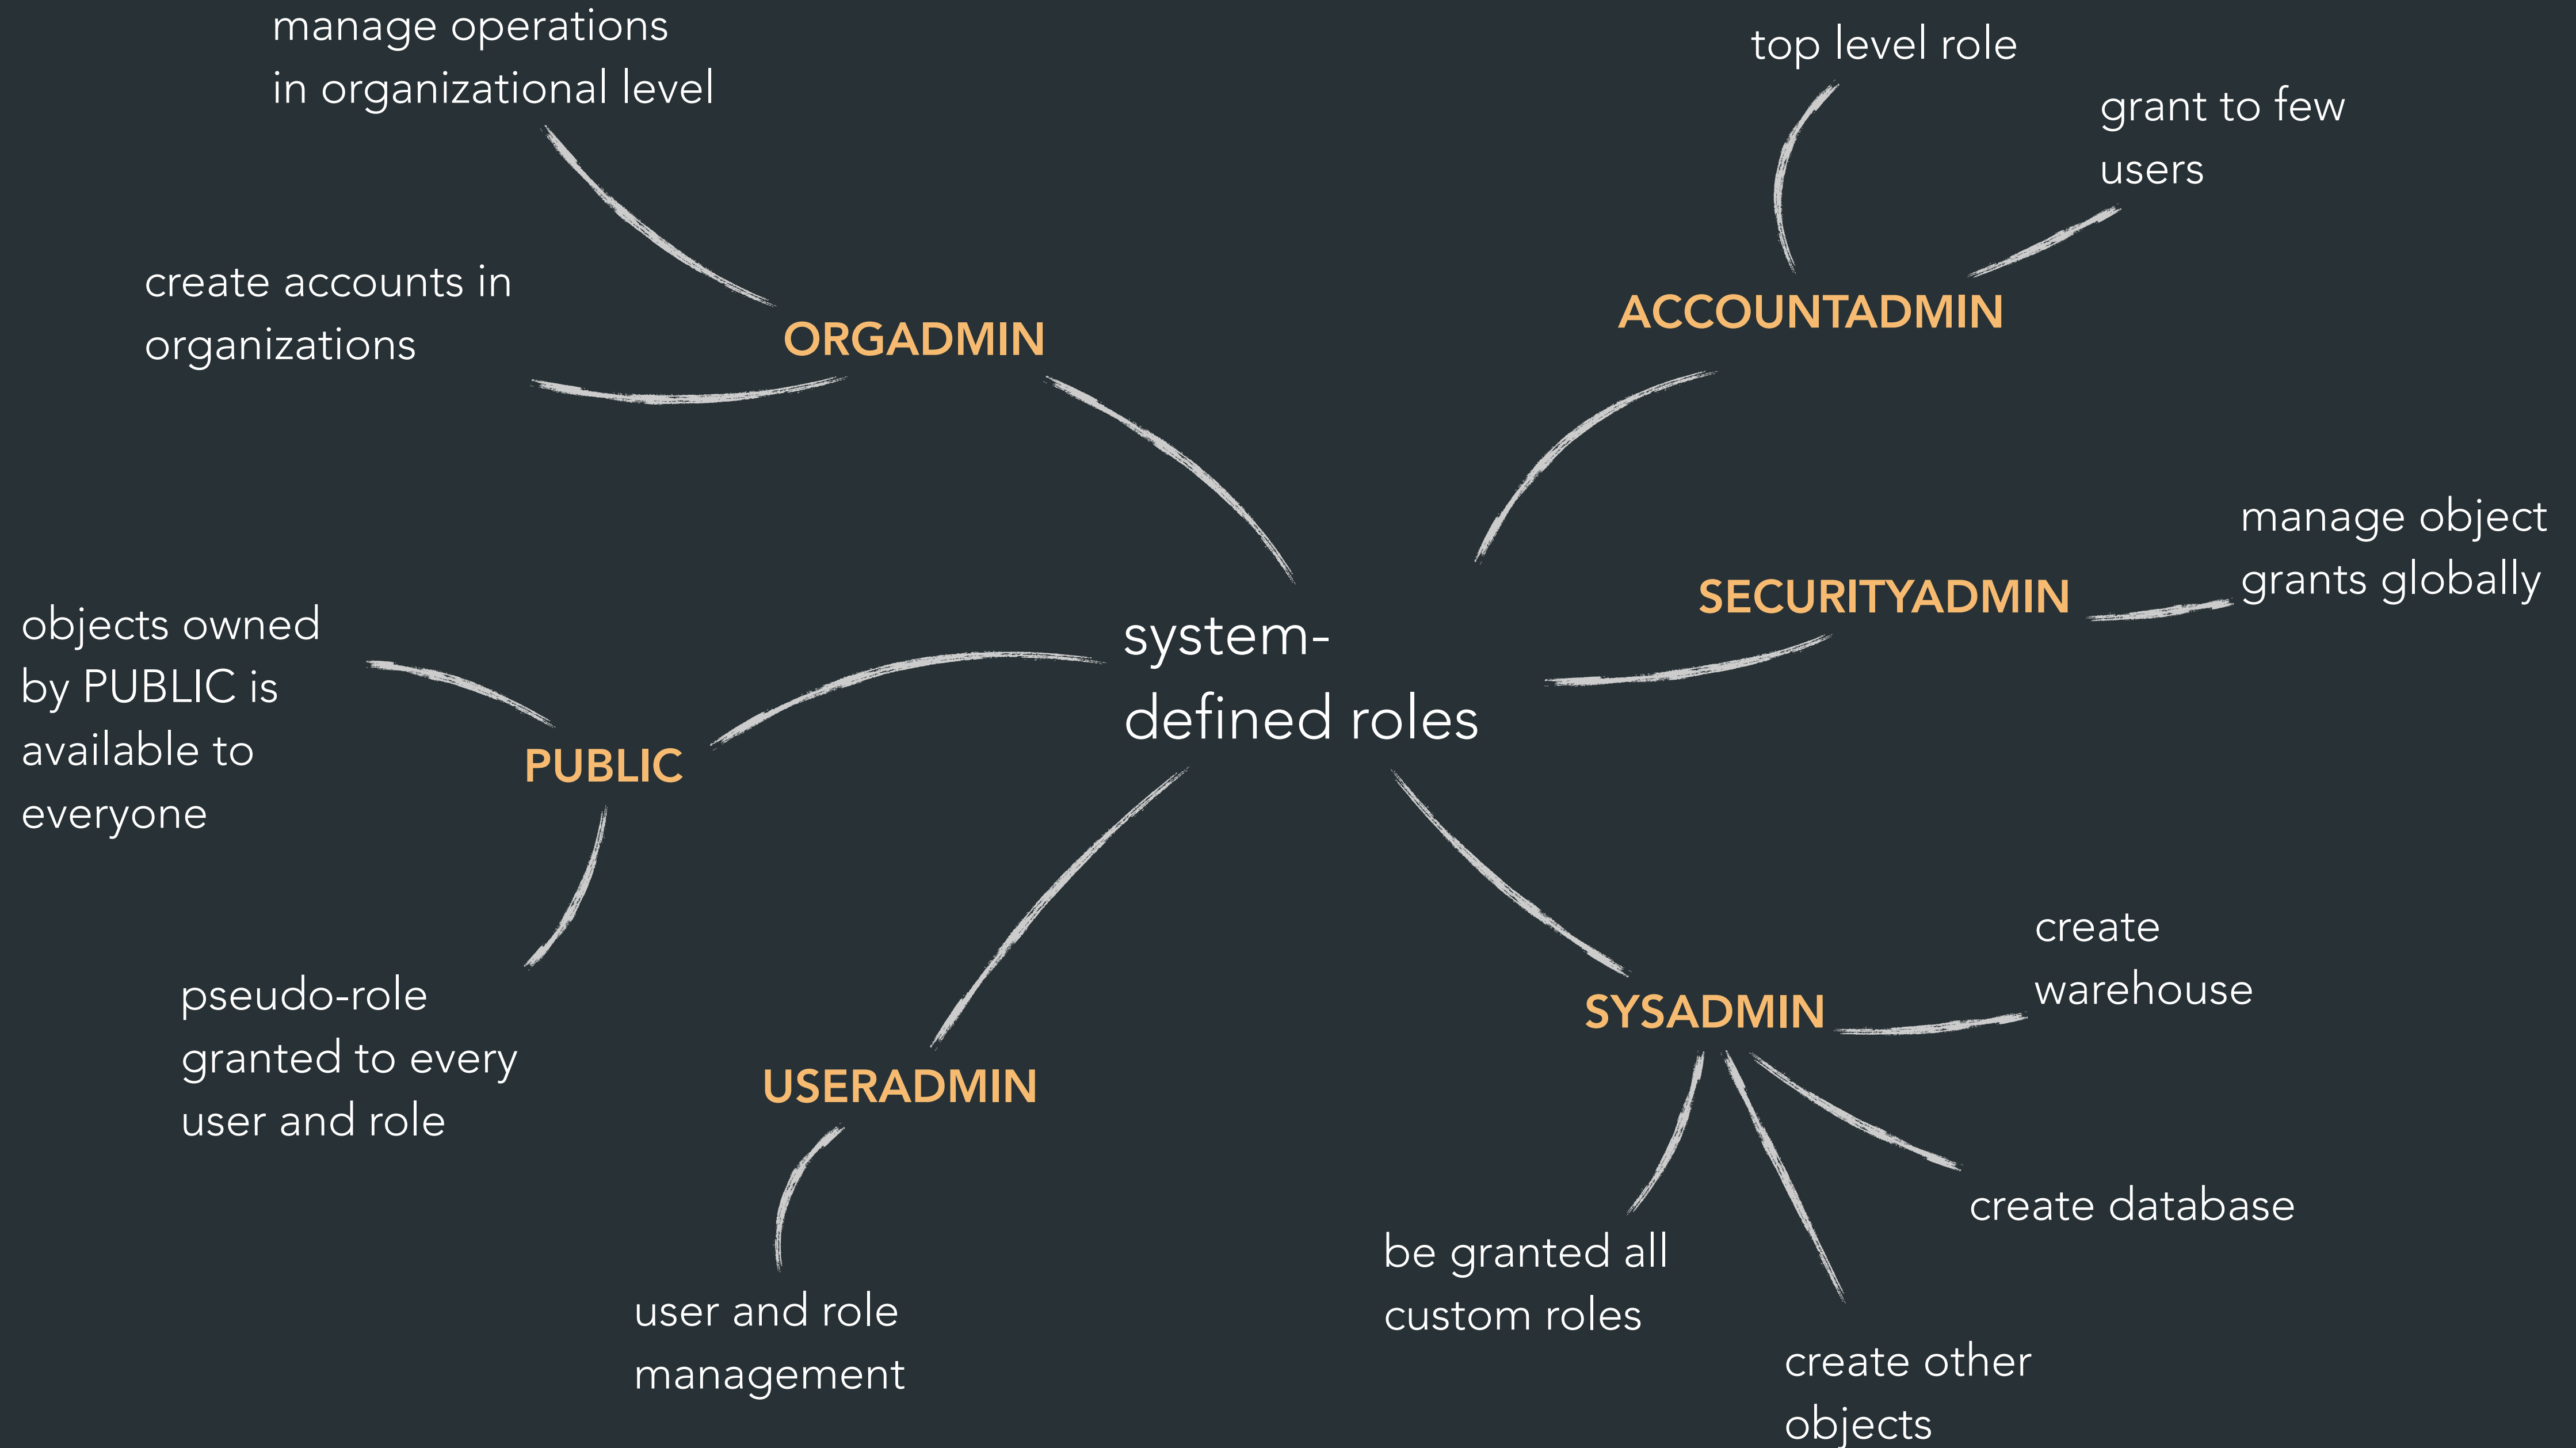

roles assigned to
users and other
roles

example of **access control**

privileges are **inherited**
